HBOT

Welcome to the Future of Personal Health Care

In our modern and stressful society, ensuring your health and wellness is not only a priority it is a must for peak performance and increased longevity. Mild Hyperbaric Oxygen Therapy chambers have been shown to be extremely safe and can increase tissue oxygenation in the body.

Whether you're seeking recovery from strenuous exercise, treating an injury, recovering from surgery, managing a chronic illness, an Anti-Aging focus or just proactive health management you will emerge feeling rejuvenated and relaxed after an hour-long session.

Hyperbaric oxygen therapy is a treatment used to increase the amount of oxygen reaching the bodies' cells. This process essentially helps Cellular Regeneration and is used to support an extensive list of conditions involving tissue damage and inflammation. The therapy is administered by a patient spending time in a hyperbaric chamber and breathing between 90 to 97% oxygen at a variety of different atmospheric pressures depending on the condition being addressed.

Cellregen supply Hyperbaric Oxygen Chambers around the world, catering for home-based chambers, chambers for commercial wellness & recovery studios and full medical grade chambers for medical facilities. We can provide high quality customized solutions and consultancy for all your projects and needs. Get the benefits of hyperbaric oxygen therapy chambers in Australia today.

Mild Hyperbaric Oxygen Therapy Options

85 & 110 L/m. oil free, no maintenance required.

10 LITRE OXYGEN CONCENTRATOR
Oxygen purity between 90 to 97%.

AIR COOLER
120L/min to remove humidity from within the chamber, no maintenance required.

ANION AIR FILTRATION SYSTEM
Eliminate air born particles and dust.

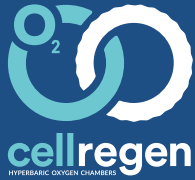

TIMING CONTROL
0-120 mins with automatic shut off.

SOUND LEVEL
All-in-One Operating Unit <50db

Weight of All-in-One Unit Specifications:
L: 766cm W: 350cm H: 750cm
Weight: 110kg

RECLINING SOFT SHELL CHAMBER

01

In the Absence of Oxygen, there is Disease

“ Disease cannot live in an oxygen rich environment! ”

RECLINING SOFT SHELL CHAMBER

01

Reclining Soft Shell Chamber Details and Technical Specifications

Working Pressure: - 1.2 / 1.3 / 1.4 & the default 1.5ATA

Weight: 36 kg

Length: Length: 2260mm **Width:** 1100mm **Height:** 1200mm

Windows: 4 large oval shaped windows

Folding Chair: Adjustable, Seated/Reclining/Lying

Internal Frames: Holds the Chambers structure when not inflated

Internal/External pressure relief valve

Polished metal material, high touch comfort and super durability. Many other hyperbaric oxygen chambers use plastic accessories, which are not durable and easy to age.

Unique Curved Zipper Shape Design

Exclusively designed a super smooth and easy-to-use zipper system. The curved zipper design incorporates a gravity sink that separates the chamber zippers and sealing strips, thereby reducing mutual friction and making entry and exit of your hyperbaric chamber much smoother and easier.

Dual Pressure Data Display In And Out

We use two aviation-grade pressure gauges with high accuracy to ensure that the pressure readings remain consistent and without errors inside and outside the chamber, making the use of mHBOT safer for you.

FOLDING CHAIR POSITIONS:

POSITION A
FLAT POSITION
AS A BED

POSITION B
SIT OR RECLINE
MODE

POSITION C
0-90°
ADJUSTABLE

LYING HARD SHELL CHAMBER

In the Absence of Oxygen, there is Disease

“ Disease cannot live in an oxygen rich environment! ”

LYING HARD SHELL CHAMBER

02

Lying Hard Shell mHBOT chamber is a state of the art chamber with a very futuristic design and are made of firm and reliable stainless steel with many features.
